

LINGO SOFTWARE AND QUICKBOOKS KEEP DATA CONNECTED

Integrated EDI is not only important, it's vital as your business grows. With eZCom and QuickBooks functioning together, you can expect accurate inventory and accounting updates across all your sales channels.

Retail Moves Fast

So we do, too

Since the retail marketplace is constantly evolving, we are always enhancing Lingo, our cloud-based software. Our developers add new features so it integrates seamlessly with other applications, and our mapping of Trading Partners never stops. Responsive and nimble with a laser focus on supply chain management, we bring an unmatched level of expertise to EDI and ecommerce.

Lingo Connector:

If you rely on Intuit QuickBooks – QuickBooks Desktop, QuickBooks Online, or QuickBooks POS to manage your business, you want an EDI platform that makes connections seamless and straightforward, allowing you to keep your inventory information up-to-date and your accounting under control.

Why Choose Us?

Together with QuickBooks, we offer a powerful system that automates transactions to reduce the errors manual entry can create. Quickbooks can be configured for full automation when integrated with Lingo, where the data is exchanged without the need for manual input. It all works to improve compliance with your Trading Partners and enhance your most important business relationships.

Custom Integration Flow

- ✓ Integrate Lingo orders into QuickBooks Sales Orders
- ✓ Create your invoices in Lingo or in QuickBooks – it automatically syncs to both so you can work the way that you prefer
- ✓ Ensures the integrity of your invoice numbers whether you use Quickbooks or Lingo to assign them
- ✓ Integrate as many retailers and order channels as you like at no extra charge
- ✓ Create payments from the EDI remittance advice document

Save Hours of Your Time

- ✓ No more manual entry of invoice numbers – save time with batch processing
- ✓ Reduce keying errors, dramatically increase accuracy and operational efficiency
- ✓ Customize your document processing to match your preferred workflow
- ✓ Take advantage of Lingo's double validation retailer compliance checking
